Corporate Profile

Eyes on what matters, day and night.

- Sharjah Police approved
- Part of the AST group

ABOUT US

Who we are

Falcon Eyes Security Systems (FESS) is strategically based in Sharjah, UAE, as a Sharjah Police approved company, and is part of the AST group of companies.

We specialise in electronic security: CCTV and video surveillance, access control, intrusion alarms, video intercom and vehicle access. Our team handles every stage, from the first site survey to installation, authority approval and long-term maintenance.

As part of the group led by Access Star Technologies, we can also call on wider ICT expertise in networks, cabling and IT infrastructure when a project needs it. We help government entities, telecom providers, oil and gas companies and industrial businesses protect people, assets and operations.

Falcon Eyes Security Systems is a Sharjah Police approved security company and part of the AST group of companies.

PURPOSE

What drives us

OUR MISSION

Security systems that simply work.

To protect people and property with reliable systems, installed properly and supported for the long term.

OUR VISION

The security partner customers trust.

To be the company organisations in the UAE call first when they need to secure a site.

WHY FALCON EYES

Why customers choose us

01

Sharjah Police approved

An approved security systems company, working to UAE authority requirements.

02

Part of the AST group

Backed by Access Star Technologies, an ICT solutions provider in Sharjah and Dubai.

03

Site survey first

We visit your site and design coverage around how it is actually used.

04

Trusted brands

Products from leading security manufacturers, installed to professional standards.

05

Complete installation

Supply, cabling, installation, configuration, testing and training.

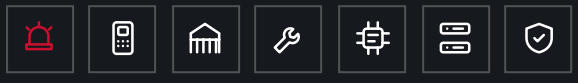

06

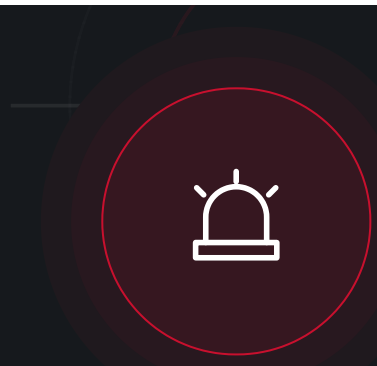

Support after handover

Maintenance contracts and responsive repairs to keep everything working.

OUR MISSION

Security systems that simply work.

SECURITY SYSTEMS

Complete security systems, from survey to support.

We supply and install systems from leading brands and connect them into one solution for your site.

CCTV & Video Surveillance

IP camera systems that let you see, record and review what happens at your sites, on site or from your phone.

- IP & HD cameras
- Recording & storage
- Remote viewing
- Video analytics
- Control rooms
- Upgrades

Access Control & Time Attendance

Control who goes where and when, with cards, PIN, fingerprint or face recognition, and accurate attendance records.

- Door access
- Time attendance
- Turnstiles & speed gates
- Visitor management
- Integration
- Multi-site management

Intrusion & Alarm Systems

Burglar alarms and sensors that detect intruders and alert you and your team immediately.

- Alarm panels
- Motion & door sensors
- Perimeter detection
- Panic buttons
- Alerts
- CCTV verification

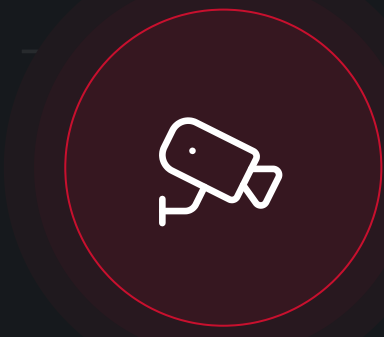

Video Intercom & Door Entry

See and speak to visitors before you let them in, at offices, facilities and secured buildings.

- Gate & door stations
- Building & site intercom
- Mobile answering
- Lift & access integration

SECURITY SYSTEMS

Complete security systems, from survey to support.

Gates, Barriers & Perimeter

Automatic gates, parking barriers and perimeter protection for car parks, plants and facilities.

- Automatic gates
- Boom barriers
- Number plate recognition
- Perimeter protection

Maintenance & AMC

Annual maintenance contracts that keep your security systems working, inspected and compliant.

- Preventive maintenance
- Repairs & replacements
- Health checks
- System takeovers

SECURITY SYSTEMS

Eyes on what matters, day and night.

IT & ICT SOLUTIONS

Infrastructure, networks, cloud and AI.

As part of the AST group, we also deliver complete IT and communication solutions with the world's leading technology vendors.

NEW

AI Services

Put artificial intelligence to work in your business, from strategy and infrastructure to practical use cases that save time and reduce risk.

- AI readiness & strategy
- Generative AI assistants
- AI video analytics
- Intelligent automation
- GPU & AI infrastructure
- Data platforms

IT Infrastructure

Custom compute, storage and virtualization built with quality vendor products and sized for your workloads.

- Servers
- Storage & backup
- Virtualization
- Hyper-converged infrastructure
- Data center build-out
- Migration & refresh

Network & Security

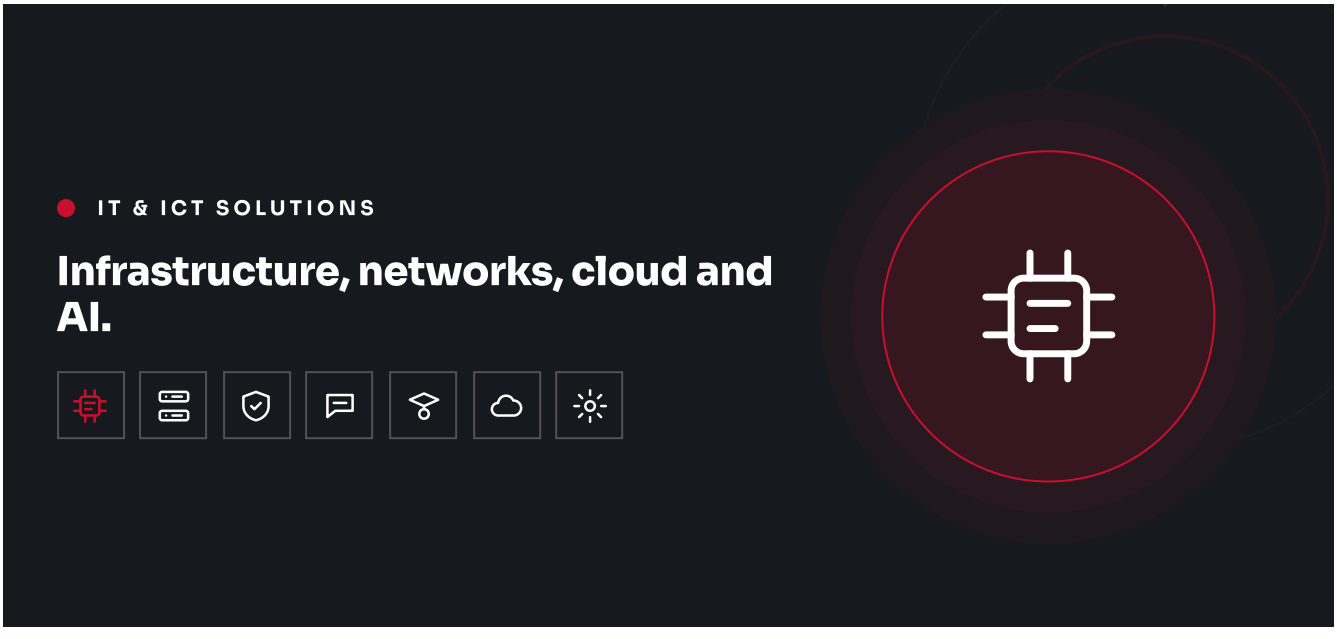

High-speed, secure and scalable networks designed around your real requirements.

- Data center network
- Campus LAN
- Enterprise WAN
- Indoor & outdoor Wi-Fi
- Firewall / IPS / IDS
- Internet access management

Communication & Collaboration

Unified communications that connect your teams and help you engage your customers.

- Unified communications
- Contact center
- IP PBX
- Video & audio conferencing

Structured Cabling & Racks

Copper and fiber cabling, racks and cabinets, designed, installed, tested and documented to standards.

- Structured cabling
- Floor & wall cabinets
- Fiber backbone
- Testing & certification

Cloud & SaaS

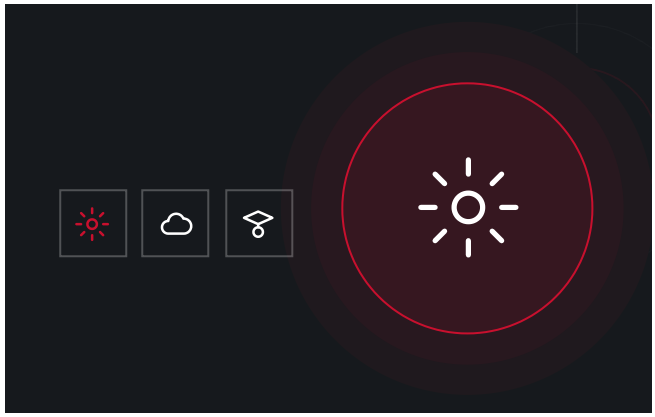

Business software on a subscription basis, with no servers to buy or maintain.

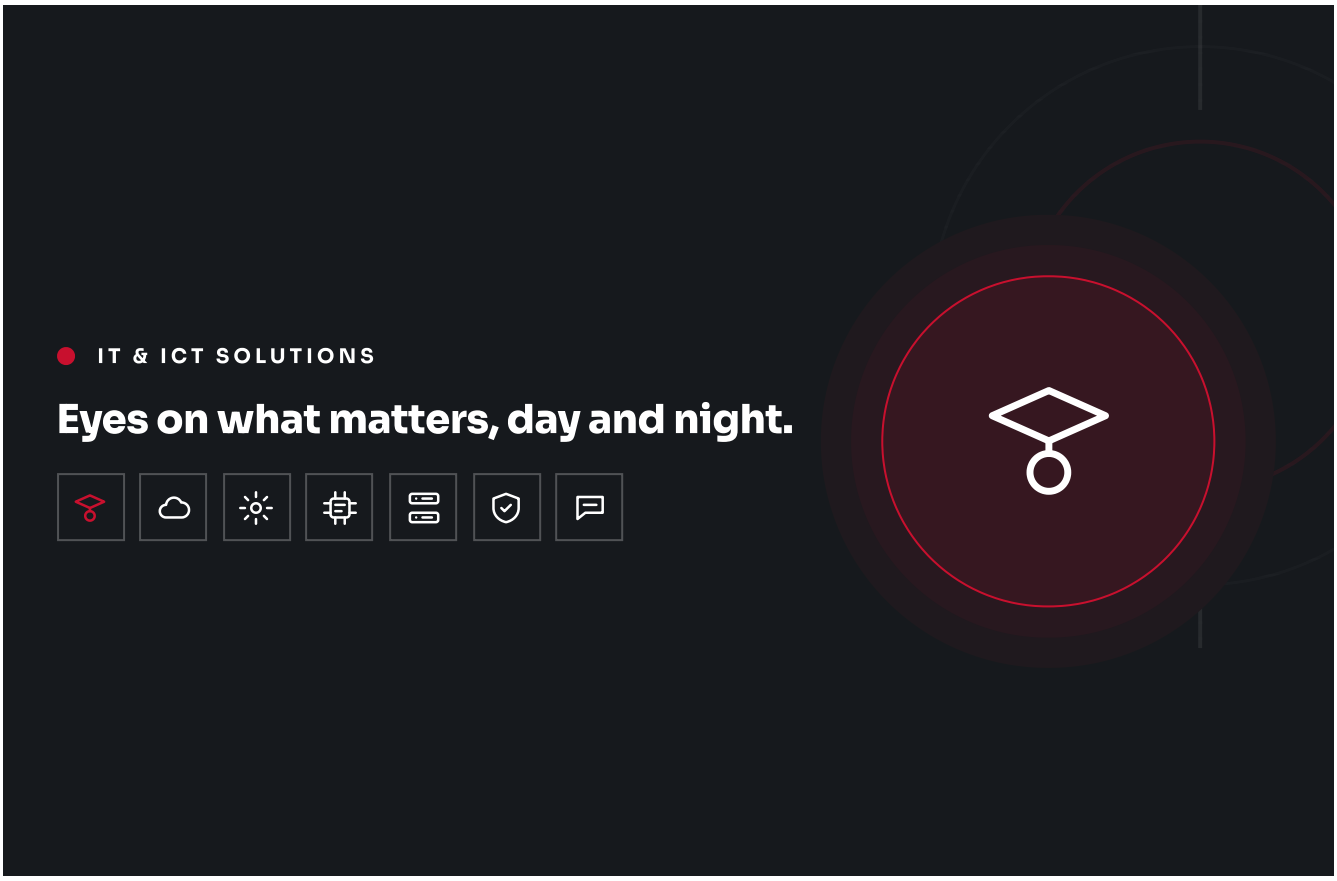

- ERP / CRM as a service
- Financial accounting as a service
- HRMS as a service
- Document management as a service
- Inventory management as a service

IT Consulting

Consultants who partner with you to evaluate technology and meet your business objectives.

- IT assessment
- Solution design
- Vendor evaluation
- Project management

INDUSTRIES

Trusted in demanding environments

TELECOM

Telecom service providers

Carrier networks need high capacity, constant availability and secure operations.

- Data center and core network infrastructure
- Collaboration and contact center platforms
- Security for networks and customer data
- Structured cabling for exchanges and facilities

PUBLIC SECTOR

Government

Government entities need secure, reliable systems that serve the public and protect sensitive information.

- Secure network and firewall solutions
- Video surveillance and access control for facilities
- Virtualized infrastructure and backup
- Unified communications for departments

ENERGY

Oil & gas

Remote and critical sites need connectivity, surveillance and systems that work in harsh environments.

- Industrial-grade networks and outdoor Wi-Fi
- Perimeter surveillance with video analytics
- Access control for restricted areas
- Robust cabling and cabinets for field sites

INDUSTRY

Industrial & manufacturing

Plants and warehouses need networks and security that keep operations running safely.

- Campus LAN and warehouse Wi-Fi
- CCTV and access control for plants
- Inventory and ERP cloud applications
- Server and storage for production systems

HOW WE WORK

Four steps to a secure site

01

Site survey

We visit your site, understand the risks and agree what needs to be covered.

02

Design & quote

Camera positions, devices and a clear proposal that fits your budget.

03

Install & approve

Professional installation, testing and support with authority approval.

04

Maintain

Training at handover, then maintenance and repairs whenever you need us.

BRANDS WE INSTALL

Working with trusted global brands

We supply, install and support products from leading manufacturers, choosing the right technology for each customer rather than a single brand for everyone.
